Sociological Theory in Use (RLE Social Theory) Kenneth Menzies 2014-08-21 Central to most sociologists' self-image is the claim that their theories are based on research. However, using a random sample of 680 articles appearing in major American, British and Canadian journals, Dr Menzies shows that in some areas of sociology the wide gap between theory and research means that much of sociological theory is virtually untested. He explains how theory is embodied in eight particular types of research, critically examines these research theories, and contrasts them with the positions of modern theorists. The sample of journal articles also permits a comparison of British, American and Canadian sociology. By contrasting on how researchers us theories, Dr Menzies is able to reassess several theories. For instance, symbolic interactionist research uses embedded causal claims and stands in a dialectical relationship to other sociological research, while the research version of conflict theory depends on external causes to explain social change. The implications of using statistical techniques like factor analysis and regression are also considered in relation to the form of explanation.

Neuroeconomic and Behavioral Aspects of Decision Making Kesra Nermend 2017-10-06 This proceedings volume presents the latest scientific research and trends in experimental economics, with particular focus on neuroeconomics. Derived from the 2016 Computational Methods in Experimental Economics (CMEE) conference held in Szczecin, Poland, this book features research and analysis of novel computational methods in neuroeconomics. Neuroeconomics is an interdisciplinary field that combines neuroscience, psychology and economics to build a comprehensive theory of decision making. Such studies are now performed by software that provides interaction among all the participants and possibilities to register their reactions more accurately. This book examines some of these applications and methods. Featuring contributions on both theory and application, this book is of interest to researchers, students, academics and professionals interested in experimental economics, neuroeconomics and behavioral economics.

Building and Maintaining Adult Learning Advantage Hai-Jew, Shalin 2020-06-26 Adult learning ability is by and large considered a "net good" and is established through extra resources, the cultivation of experiences, and services like tutoring and test-taking. Radical Challenges for Social Work Education Jane Fenton 2022-04-14 This book is full of ideas about how social work education can confront the individualising and often blaming form of social work that neoliberalism ushered in four decades ago. Radical social work is an approach to social work that has, at its heart, the departure from solely behavioural, moral or psychological understanding of service users' problems. Social work had originally been concerned with the moral character of people in trouble (usually poor people), making a clear division between those who were 'deserving' of help and those who were 'undeserving'. The rise of science and the 'psy' disciplines then led to psychological explanations for the difficulties people found themselves in. Both explanations for social problems - moral and psychological - with their narrow focus on the individual have been enjoying a renaissance in recent times with the neoliberal self-sufficiency narrative (moral) and the more recent focus on trauma (psychological). Radical social work challenges those explanations, concerned as it is with the circumstances a person might find themselves in - poverty, poor housing, poor education, high crime rates, and lack of opportunities of all kinds. This book is a step towards resurrecting radical social work principles, and it urges us to think about how social work education can be reshaped to that end. Radical Challenges for Social Work Education is a significant new contribution to social work practice and theory, and will be a great resource for academics, researchers, and advanced students of Politics, Education, Social Work, Sociology, Public Policy, Development Studies, Anthropology, and Human Geography. The chapters in this book were originally published as a special issue of the journal Social Work Education.

Critical Realism, Feminism, and Gender: A Reader Michiel van Ingen 2020-05-10 In assessing the current state of feminism and gender studies, whether on a theoretical or a practical level, it has become increasingly challenging to avoid the conclusion that these fields are in a state of disarray. Indeed, feminist and gender studies discussions are beset with persistent splits and disagreements. This reader suggests that returning to, and placing centre-stage, the role of philosophy, especially critical realist philosophy of science, is invaluable for efforts that seek to overcome or mitigate the uncertainty and acrimony that have resulted from this situation. In particular, it claims that the dialectical logic that runs through critical realist philosophy is ideally suited to advancing feminist and gender studies discussions about broad ontological and epistemological questions and considerations, intersectionality, and methodology, methods, and empirical research. By bringing together four new and eight existing writings this reader provides both a focal point for renewed discussions about the potential and actual contributions of critical realist philosophy to feminism and gender studies and a timely contribution to these discussions.

Transforming Early Head Start Home Visiting Bridget A. Walsh 2019-10-29 Research on home visiting shows that Early Head Start (EHS) home-based programs benefit from additional training and resources that streamline philosophy and content. In this essential guide, Walsh and Mortensen propose that alignment with Family Life Education's (FLE) strengths-based methodology results in greater consistency through a model of prevention, education, and collaboration with families. This text is the first to outline linkages between FLE and EHS home visiting. It explores a qualitative study of FLE integrated in a current EHS home-based program and application of FLE methodology to home visiting topics. This approach will influence professional practice and provide a foundation for developing evidence-based home visiting practices. Online content accompanies the text, with videos demonstrating the FLE approach in action and discussion questions to encourage engagement with and understanding of the core material. Transforming Early Head Start Home Visiting: A Family Life Education Approach is essential reading for upper-level undergraduate and masters students in family studies and early childhood education, as well as practitioners working with children and families.

Strategic Communication and its Role in Conflict News Marc Jungblut 2020-01-13 Marc Jungblut extends existing knowledge on the role of strategic communication in conflict news by examining four violent conflicts. He relies on an automated content analysis of texts by 52 strategic communicators, such as politicians, NGOs, social movements, as well as on the international news coverage in 17 media outlets. By analyzing over 80,000 texts in seven languages, the book demonstrates that media visibility is almost exclusively granted based on ethnocentrism and elite status. The journalistic framing of conflict events, however, is much more context-dependent and shows a higher degree of independence from elite voices and strategic communication in general.

The Hermeneutic Imagination (RLE Social Theory) Josef Bleicher 2014-08-13 In his previous book, Contemporary Hermeneutics, Josef Bleicher offered an introduction to the subject, locating it mainly within the philosophy of social science, and looking at the profound impact it is having on a wide range of intellectual pursuits. This book follows on from this and expounds the author's view that the development of the hermeneutic imagination is an indispensable condition for reflexive sociological work and emancipatory social practice. Dr Bleicher examines the various approaches to sociology - empiricist, functionalist, structuralist, interpretive, critical - by reference to a hermeneutic paradigm, and shows how the hermeneutic imagination leads to a redirection in sociology, away from scientific presuppositions and towards an awareness of the dialogue which links the subject and object in the study of social phenomena. He argues that by allowing the hermeneutic imagination to develop, it is possible to counter the steering of social processes on the basis of technocratic imperatives, and to provide a rational anticipation of a better future.

Step by step, chapters address the key concepts of role transition including preparation for a particular role, as well as ethical practice, theory application, quality control, and terminal degree options. Each career discussion features required competencies and information new MSNs will find invaluable, all within a consistent format to aid comparison. Competitiveness, Organizational Management, and Governance in Family Firms Camisón, Cesar 2019-11-22 The "family effect" remains a challenge for researchers interested in both the family firm's organizational form and in the effects of familial ownership on a firm's strategy, structure, and performance. Governance mechanisms, management quality, ownership concentration, and family involvement all have relevant effects in terms of influencing monitoring costs, investment decisions, the development of the portfolio of resources and capabilities, and family firm competitiveness. Nevertheless, few studies to date have opened the black box of the "family effect." Competitiveness, Organizational Management, and Governance in Family Firms is an essential reference source that makes a clear distinction between the separation of ownership and management, on the one hand, and the institutional development of family governance instruments, on the other, to help uncover the asymmetric effects of these two choices. It also allows the examination as to which of the two strategies employed in family firms reinforce managerial capital that has a greater positive impact on the "family effect," thus helping to achieve better managerial capabilities. Featuring research on topics such as corporate governance, private business, and successional leadership, this book is ideally designed for managers, executives, CEOs, company owners, consultants, business professionals, entrepreneurs, academicians, and researchers interested in an in-depth understanding of the keys to success and survival of family-operated organizations.

Play: A Theory of Learning and Change Tara Brabazon 2015-12-12 This book examines the question of why 'play' is a happy and benevolent verb in childhood, yet a subjective label of behaviour in adulthood. It studies the transformation of the positively labelled term 'child's play', used to refer to our early years, into an aberrance or deviation from normal social relationships in later life, when we speak of playing up or playing around. It answers the question by proposing play as a theory of learning, an ideology that circumscribes behaviour, and a way of thinking. Written by scholars of early childhood through to further and higher education, the book presents research on play enacted in a way that arches beyond the specificity of age groups or predictive, normative patterns. It is international in its focus, moving beyond insular, inward and parochial educational standards and limitations in one city, province, state or nation. Finally, it demonstrates the value of play to educational policy and theories of learning.

Multicriteria and Multiobjective Models for Risk, Reliability and Maintenance Decision Analysis Adiel Teixeira de Almeida 2015-07-01 This book integrates multiple criteria concepts and methods for problems within the Risk, Reliability and Maintenance (RRM) context. The concepts and foundations related to RRM are considered for this integration with multicriteria approaches. In the book, a general framework for building decision models is presented and this is illustrated in various chapters by discussing many different decision models related to the RRM context. The scope of the book is related to ways of how to integrate Applied Probability and Decision Making. In Applied Probability, this mainly includes: decision analysis and reliability theory, amongst other topics closely related to risk analysis and maintenance. In Decision Making, it includes a broad range of topics in MCDM (Multi-Criteria Decision Making) and MCDA (Multi-Criteria Decision Aiding; also known as Multi-Criteria Decision Analysis). In addition to decision analysis, some of the topics related to Mathematical Programming area are briefly considered, such as multiobjective optimization, since methods related to these topics have been applied to the context of RRM. The book addresses an innovative treatment for the decision making in RRM, thereby improving the integration of fundamental concepts from the areas of both RRM and decision making. This is accomplished by presenting an overview of the literature on decision making in RRM. Some pitfalls of decision models when applying them to RRM in practice are discussed and guidance on overcoming these drawbacks is offered. The procedure enables multicriteria models to be built for the RRM context, including guidance on choosing an appropriate multicriteria method for a particular problem faced in the RRM context. The book also includes many research advances in these topics. Most of the multicriteria decision models that are described are specific applications that have been influenced by this research and the advances in this field. Multicriteria and Multiobjective Models for Risk, Reliability and Maintenance Decision Analysis is implicitly structured in three parts, with 12 chapters. The first part deals with MCDM/A concepts methods and decision processes. The second part presents the main concepts and foundations of RRM. Finally the third part deals with specific decision problems in the RRM context approached with MCDM/A models.

Research Anthology on Strategies for Maintaining Successful Family Firms Management Association, Information Resources 2021-08-27 Family-owned businesses account for many of the small and medium-sized enterprises that exist around the world in various industries. Due to their unique make up, these firms are often heavily influenced by family dynamics that must be reconciled by family and non-family workers alike in order to ensure the sustainability of the business. As smaller businesses competing against an increasingly globalized economy and more directly impacted by economic instability, especially in the wake of the COVID-19 pandemic, these businesses must continue to improve their practices and processes in order to not only survive but thrive. The Research Anthology on Strategies for Maintaining Successful Family Firms discusses the strategies, sustainability, and human aspects of family firms in order to understand what sets them apart from other businesses and how they can survive and compete in a globalized economy. This book discusses the unique dynamic brought by family firms that offers both opportunities and challenges for a growing business. Covering topics such as corporate venturing, the family unit, and business ethics, this text is an essential resource for family firms, entrepreneurs, managers, business students, business professors, researchers, and academicians.

Handbook of Research on Applied Social Psychology in Multiculturalism Christiansen, Bryan 2021-06-18 Social psychology is the scientific study of how the thoughts, feelings, and behaviors of individuals are influenced by the actual, imagined, and implied presence of others. In this definition, scientific refers to the empirical investigation using the scientific method, while the terms thoughts, feelings, and behaviors refer to the psychological variables that can be measured in humans. Moreover, the notion that the presence of others may be imagined or implied suggests that humans are malleable to social influences even when alone, such as when watching videos or quietly appreciating art. In such situations, people can be influenced to follow internalized cultural norms. Social psychology deals with social influence, social perception, and social interaction. The research in this field deals with what shapes our attitudes and how we develop prejudice. The Handbook of Research on Applied Social Psychology in Multiculturalism explores social psychology within the context of multiculturalism and the way society deals with cultural diversity at national and community levels. It will cover major topics of social psychology such as group behavior, social perception, leadership, non-verbal behavior, conformity, aggression, and prejudice. This book will deal with social psychology with a direct focus on how different cultures can coexist peacefully by preserving, respecting, and even encouraging cultural diversity, along with a focus on the psychology that is hindering these efforts. This book is essential for researchers in social psychology and the social sciences, activists, psychologists, practitioners, researchers, academicians, and students interested in how social psychology interacts with multiculturalism.

The Right to Health Care: Ethical Considerations Eike-Henner W. Kluge 2022-01-13 This book provides an in-depth ethical analysis of the right to health care by contrasting privatized with socialized approaches. It pays special attention to how a socialized approach can be implemented in the context of limited resources and offers a way of integrating allocation decisions at the policy level with institutional and hands-on

decision-making. It also discusses how the right to health care translates into duties on part of the members of society. In an Appendix, it suggests how, in time of need, the TRIPS Agreement allows countries to side-step patent regulations that would otherwise raise the cost of patented healthcare products beyond what a particular society is able to afford. The book is of interest not only to scholars but also to healthcare policy makers, administrators and healthcare professionals, as well as to patients themselves.

Contract Law and Contract Practice Catherine E Mitchell 2014-07-18 An oft-repeated assertion within contract law scholarship and cases is that a good contract law (or a good commercial contract law) will meet the needs and expectations of commercial contractors. Despite the prevalence of this statement, relatively little attention has been paid to why this should be the aim of contract law, how these 'commercial expectations' are identified and given substance, and what precise legal techniques might be adopted by courts to support the practices and expectations of business people. This book explores these neglected issues within contract law. It examines the idea of commercial expectation, identifying what expectations commercial contractors may have about the law and their business relationships (using empirical studies of contracting behaviour), and assesses the extent to which current contract law reflects these expectations. It considers whether supporting commercial expectations is a justifiable aim of the law according to three well-established theoretical approaches to contractual obligations: rights-based explanations, efficiency-based (or economic) explanations and the relational contract critique of the classical law. It explores the specific challenges presented to contract law by modern commercial relationships and the ways in which the general rules of contract law could be designed and applied in order to meet these challenges. Ultimately the book seeks to move contract law beyond a simple dichotomy between contextualist and formalist legal reasoning, to a more nuanced and responsive legal approach to the regulation of commercial agreements.

The Philosophy and Psychology of Ambivalence Berit Brogaard 2020-12-23 This book collects original

essays by top scholars that address questions about the nature, origins, and effects of ambivalence. While the nature of agency has received an enormous amount of attention, relatively little has been written about ambivalence or how it relates to topics such as agency, rationality, justification, knowledge, autonomy, self-governance, well-being, social cognition, and various other topics. Ambivalence presents unique questions related to many major philosophical debates. For example, it relates to debates about virtues, rationality, and decision-making, agency or authenticity, emotions, and social or political metacognition. It is also relevant to a variety of larger debates in philosophy and psychology, including nature vs. nature, objectivity vs. subjectivity, or nomothetic vs. idiographic. The essays in this book offer novel and wide-ranging perspectives on this emerging philosophical topic. They will be of interest to researchers and advanced students working in ethics, epistemology, philosophy of mind, philosophy of psychology, and social cognition.
