Integrated Assessment of Climate Change Impacts and Urban Resilience Beniamino Russo 2021-03-09 This book brings together recent research related to urban resilience, in particular, taking into account climate change impacts and hydrological hazards. Due to the complexity of our cities, which are vulnerable and continuously evolving systems, urban resilience should be considered as a transversal and multi-sectorial issue, affecting different urban services, several hazards, and all the steps of the risk management cycle. Within this context, the different pieces of research that form this book deal with the topics of multi-risk and urban resilience assessment, analysis of cascading effects, and the proposal and prioritization of adaptation measures and strategies to cope with climate-related hazards through multi-criteria analysis.

Good Practice in Archaeological Diagnostics Cristina Corsi 2013-12-11 This volume represents the most important “deliverable” of the European-funded project Radio-Past (www.radiopast.eu). It is intended to disseminate the key results achieved in the form of methodological guidelines for the application of non-destructive approaches in order to understand, visualize and manage complex archaeological sites, in particular large multi-period settlements whose remains are still mostly buried. The authors were selected from among the project research “staff” but also from among leading international specialists who served as speakers at the two international events organized in the framework of the project (the Valle Giulia Colloquium of Rome – 2009 and the Colloquium of Ghent – 2013) and at the three Specialization Fora, the high formation training activities organized in 2010, 2011 and 2012. As such, the book offers contributions on diverse aspects of the research process (data capture, data management, data elaboration, data visualization and site management), presenting the state of the art and drafting guidelines for good practice in each field.

Handbook of Globalisation and Tourism Dallen J. Timothy 2019-12-27 Globalization entails the world becoming a smaller place through political, socio-cultural and economic processes. These processes have salient implications for tourism, and tourism itself is one of the driving forces behind globalization. This book is a collection of conceptual treatises by international scholars about the dynamics and reach of globalization and its relationships with tourism. It anatomizes and deconstructs the global forces, processes and challenges that face the world of tourism. It is international in scope, encyclopedic in its conceptual depth, empirically evocative, and contemporary in its coverage.

The Complete Guide To Outplacement Counseling Alan J. Pickman, PhD 2013-10-23 Recognized by business managers as a useful and practical tool to assist them in responding to a set of complex business challenges, the need for outplacement counseling-- the process of assisting employees who have lost their jobs to develop effective career plans and to find new employment --has grown dramatically during the past two decades. Given this rapid expansion of the field, assembling, organizing, and clarifying the body of knowledge and information available about outplacement has become critically important. The first comprehensive effort in the field, this book presents authoritative, up-to-date information on an exhaustive range of outplacement topics. A psychologist and experienced outplacement practitioner, the author has recently been chosen as one of the charter fellows of the Outplacement Institute, the sole certifying organization for outplacement practitioners. Of value to all those interested in the field including current and future practitioners as well as human resources professionals, this volume contains essential information for candidates receiving outplacement services, counseling students, and researchers involved in the study of counseling in business and industry. With such a broad audience in mind, it contains a wide range of information--counseling theory and practical suggestions geared expressly to the needs of practitioners, descriptive material on all topics, and brief case histories of actual outplacement candidates. Written in non-technical language, the volume brings to life the flavor of outplacement practice. This unique volume covers topics not addressed elsewhere in the current outplacement literature including: *the psychological barriers to a successful job search, *the behavioral and counseling implications of the outplacement setting, *the theoretical basis of outplacement counseling, *the relation between outplacement and psychotherapy, *the professional development opportunities for outplacement practitioners, *the supervision of outplacement practitioners, *the cross-cultural issues to be considered in outplacement, *the relation of outplacement to other career development professionals, and *the marketing of outplacement services. Also of importance, the appendices offer data not previously disseminated to the general public including: *competencies standards for OPC practitioners as established by the International Association of Outplacement Professionals (IAOP), *standards of ethical practice for outplacement professionals as established by the IAOP, and *listings of information resources for OPC practitioners and candidates featuring a section on computer-based sources for conducting career-related research.
