Physical Testing of Paper Roman E Popil 2017-12-12 This book reflects decades of the author's experience as a research scientist and lab manager providing industry clients, manufacturers, product developers, marketing and distribution organisations with data to answer queries regarding product quality concerns, variability, runnability, convertibility and printability. The basic principles underlying the various testing methods are used to illustrate how their interrelationships lead to validated findings and solving problems. This book covers the basic accepted standard industry mechanical tests supplemented by ultrasonic methods applied to examples of commercial and laboratory handsheet sample sets, presenting the testing technique, data and analysis. Focus is concentrated on the tests that are most frequently required, such as tensile and compression strengths, stiffness for papers and corrugated board, and relevant water absorption characteristics. It is aimed at the interested paper industry technologist or researcher at an introductory level who wishes to establish a fundamental understanding of what the physical testing results mean, how to avoid common pitfalls and most importantly, how to interpret the results from a paper physics point-of-view.

Action Research into Teaching English in Russia's Professional Context Natalia A. Gunina 2015-10-13 This book is a result of the investigative attempts of linguistics professionals to identify and meet the challenges of developing communicative competence in future engineers, economists and other such specialists. The unifying feature of all the contributions brought together here is the active involvement of the authors in practical instruction of English for specific professional purposes at the tertiary (bachelors' and masters' programs) level in Russia. This volume covers a number of relevant areas in this field, including new developments in methodology, approaches to course and materials design, and the contribution of language theory to foreign language teaching in a professional context. The unique teaching approach advocated in this book denounces the traditional practice of transferring classical methodology of communicative-oriented teaching to language classes for students with a non-linguistic or non-teaching professional orientation. The underlying idea of this volume is that a change in professional context implies a change in language teaching methodology, including materials, techniques and target competences. The

ideas and experiences analysed here will appeal to anyone interested in the current trends in foreign language teaching and learning and particularly to educationalists.

Innovative Approaches in Teaching English Writing to Chinese Speakers Barry Lee Reynolds 2021-01-18 English writing is acknowledged as an essential skill for critical thinking, learning, and expression, and most EFL learners find themselves struggling when writing in English due to a lack of writing skills, content knowledge, writing strategies, intrinsic motivation, and fluency development practice. This edited volume, covering innovative approaches such as e-learning, strategy-based instruction, metacognitive training, a minimal grammar approach, writing assessment, and a genre-based approach, aims to innovate writing instruction in Chinese speaking regions, which has traditionally been characterized by rigid, teacher-centered, test-oriented approaches. We aim for this edited volume to provide theoretical underpinnings as well as contemporary practical advice related to EFL writing instruction for Chinese speakers.

Strategies for Implementing Writer's Workshop

Tao of Composition Stuart Kantor 2003-06-26 With the Tao of Composition, no longer does producing a paper become a tedious process filled with endless redundancies and plagiarism. Now students can learn and apply a basic organizational structure to their writing without wondering how to construct the basic elements of any academic essay. No longer will you have to sit in front of the computer the night before the paper is due and regurgitate stream-of-consciousness drivel connected loosely with evidence.

Richard Gentry 2016-03-01 Strategies for Implementing Writer's Workshop is as research-based, easy-to-use resource that includes all the tools needed to create a successful Writer's Workshop and enhance student writing. Teachers will learn classroom-tested techniques and engaging instructional approaches to support all levels of writers. This resource provides sample mini lessons, activities, classroom snapshots, student resources, and more. Lesson plans are tailored to these specific grade spans: K-2, 3-5, 6-8.
