The Oxford Handbook of Suicide and Self-injury

Matthew K. Nock 2014-05-13 Suicide is a perplexing human behavior that remains among the leading causes of death worldwide,

responsible for more deaths each year than all wars, genocide, and homicide combined. Although suicide and other forms of self-injury have baffled scholars and clinicians for thousands of years, the past few decades have brought significant leaps in our understanding of these behaviors. This volume provides a comprehensive summary of the most important and exciting advances in our understanding of suicide and self-injury and our ability to predict and prevent it. Comprised of a formidable who's who in the field, the handbook covers the full spectrum of topics in suicide and self-injury across the lifespan, including the classification of different self-injurious behaviors, epidemiology, assessment techniques, and intervention. Chapters probe relevant issues in our society surrounding suicide, including assisted suicide and euthanasia, suicide terrorism, overlap between suicidal behavior and interpersonal violence, ethical considerations for suicide researchers, and current knowledge on survivors

of suicide. The most comprehensive handbook on suicide and self-injury to date, this volume is a must-read text for graduate students, fellows, academic and research psychologists, and other researchers working in the brain and behavioral sciences.

Enantiomers Racemates and Resolutions

Jean Jacques 1981-09-23 Analyzes in detail the properties of enantiomers (fusion behavior, solubility, crystallization, distillation, and sublimation), enantiomer mixtures, and racemates. Surveys theory and practice of resolutions, considering classical and chromatographic resolutions and those by direct crystallization. Discusses the monitoring of resolutions through appropriate enantiometric purity determinations.

Dealing Creatively with Death Ernest Morgan 1994 "This manual on death education is a 'must' for any involved in hospice care or work with the

terminally ill. It covers everything from living with terminally ill individuals to the right to die, memorial societies, and death ceremonies. Its focus on the emotional and economic costs of death is unparalleled".--"Midwest Book Review".

Blue Coat Or Powdered Wig Stewart R. King 2007-11-01 By the late 1700s, half the free population of Saint Domingue was black. The French Caribbean colony offered a high degree of social, economic, and physical mobility to free people of color. Covering the period 1776-1791, this study offers the most comprehensive portrait to date of Saint Domingue's free black elites on the eve of the colony's transformation into the republic of Haiti. Stewart R. King identifies two distinctive groups that shared Saint Domingue's free black upper stratum, one consisting of

planters and merchants and the other of members of the army and police forces. With the aid of individual and family case studies, King documents how the two groups used different strategies to pursue the common goal of economic and social advancement. Among other aspects, King looks at the rural or urban bases of these groups' networks, their relationships with whites and free blacks of lesser means, and their attitudes toward the acquisition, use, and sale of land, slaves, and other property. King's main source is the notarial archives of Saint Domingue, whose holdings offer an especially rich glimpse of free black elite life. Because elites were keenly aware of how a bureaucratic paper trail could help cement their status, the archives divulge a wealth of details on personal and public matters. *Blue Coat or Powdered Wig* is a vivid portrayal of race relations far from the European centers of colonial power, where the interactions of free blacks and whites were governed as much by practicalities and shared concerns as by the law.

Nishina Memorial Lectures Nishina Memorial Foundation 2007-11-22 This volume is a collection of Nishina Memorial Lectures delivered by distinguished physicists during the past 50 years at the invitation of the Nishina Memorial Foundation. The Lectures commemorate Yoshio Nishina, the father of modern physics in Japan. Listen to the voice of W. Heisenberg: in the right column you can download the first minutes of his lecture "Abstraction in Modern Science" recorded in 1967! You can read the remainder of this lecture and all other lectures online via the link under "E-content". It is hoped that this volume will help young readers to grasp and enjoy the progress of modern physics.

New Directions in the Study of Late Life

Religiousness and Spirituality Susan H. Mcfadden 2014-05-01 Examine the questions of “how,” “what,” and “why” associated with religiousness and spirituality in the lives of older adults! New Directions in the Study of Late Life Religiousness and Spirituality explores new ways of thinking about a topic that was once taboo but that has now attracted considerable attention from the gerontological community. It examines various approaches to methodology and definition that are used in the study of religion, spirituality, and aging. In addition, it explores the ways that gerontological research can highlight the role of religion and spirituality in the lives of older adults. The first section will introduce you to new ways of thinking about research methodology and data analysis that can be applied to studying the complexity of older adults' religious/spiritual practice and beliefs. You'll learn several approaches to the study of phenomena that are both personal and also deeply embedded in community. The second

section addresses issues of definition, exploring important questions that call for critical reflection, such as: “What are we studying?” “What social and psychological influences shape our thinking about definition?” and “Do the definitions used by gerontologists match those held by older people?” The final section moves the study of religion, spirituality, and aging beyond a focus on health and mortality to examine well-being more broadly in the context of the life experiences of older adults. Here is a small sample of what you'll learn about in New Directions in the Study of Late Life Religiousness and Spirituality: structural equation modeling—a statistical method designed to capture the dynamics inherent in the passage of time feminist qualitative methods for studying spiritual resiliency in older women spirituality as a public health issue the differences between groups of older people in the way they define religion and spirituality the psychosocial implications of two types of religious

orientation—"dwelling" and "seeking" older women's responses to the experience of widowhood and to the question of whether their religious beliefs were affected by the experience how social context influences our decisions and our interpretations of people's religious beliefs, behaviors, and experiences the ways that people caring for a spouse with dementia rely on religious coping a model that delineates three different ways people relate to God in coping—and a study that asks whether these types of coping produce different outcomes for caregivers how people adjust to bereavement as a function of their beliefs about an afterlife Acute Grief and the Funeral Vanderlyn R. Theology of the Open Table Eojin Lee 2016-11-23 Theology of the Open Table begins with research on the traditional eucharistic understanding in the Presbyterian Church of Korea (PCK) through cultural and social analyses. In developing his argument, Eojin Lee has especially researched the biblical, theological, and early church sources in relation to his subject, the Eucharist and the open table. This

book seeks to provide sound theological justification for the open table with an introduction of practices of the open table in the Uniting Church in Australia (UCA).
