Service-Oriented Computing Michael Maximilien 2017-11-03 This book constitutes the proceedings of the 15th International Conference on Service-Oriented Computing, ICSC 2017, held in malaga, Spain, in November 2017. The 33 full papers presented together with 20 short papers and 4 keynotes in this volume were carefully reviewed and selected from 179 submissions. The selected papers cover a wide variety of important topics in the area of service-oriented computing, including foundational issues on service discovery and service-systems design, business process modelling and management, economics of service-systems engineering, as well as services on the cloud, social networks, the Internet of Things (IoT), and data analytics. The chapter "Risk-based Proactive Process Adaptation" is available open access under a CC BY 4.0 license via link.springer.com.

Beyond Sound Scott L. Phillips 2013-05-15 Beyond Sound is a must-read for anyone who loves music technology and wants to build a career in this competitive, fast-paced world. Author Scott L. Phillips draws on his seventeen-year career as a technology trainer and educator, and his extensive network of music technology professionals, to present an intimate view of the exciting world of music technology. The book offers an in-depth consideration of music technology education, including looks at specific programs and a clear explanation of different types of degrees. Moreover, it provides practical guidance on career preparation, including how to get a great internship, how to land that first job, and how to make connections and move up in a variety of businesses from recording to television and film to video games. And Phillips brings stories from successful professionals, who share their experiences, advice, and suggestions.
